

# CALL FOR PAPERS

**ICSEPS 2020**  
**Mar 19-20, 2020**  
**Prague, Czechia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSEPS 2020 : International Conference on Sustainable Energy and Power Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sustainable Energy and Power Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Power systems

Advanced signal processing for smart grids

Micro-grids and nano-grids

Energy storage devices and systems

Capacitors and reactors

Transmission and distribution

Power system analysis, modeling, control and stability, protection and operations

Distributed generation

Micro electro-mechanical systems

Thermodynamics

Fluid machinery

Theory of machines

Materials science and technology

Circuit theory and network

Electrical machines

Combustion engines

Materials for power engineering
