

CALL FOR PAPERS

ICSMAMH 2020
Mar 19-20, 2020
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSMAMH 2020 : International Conference on Smart Manufacturing and Automated Material Handling is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Smart Manufacturing and Automated Material Handling. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Smart manufacturing	Manufacturing intelligence and
Smart manufacturing strategies	manufacturing informatics
Automated material handling	Mobile and wireless applications
Big data analytic and applications	Product design and virtual design
Computational intelligence for	Yield enhancement systems and
smart manufacturing	Condition monitoring of equipment
Data mining and production	and processes
improvement	Energy efficiency, efficient design
Data science and machine learning	and systems
for smart manufacturing	Autonomous manufacturing
Decision support systems	Cyber-physical systems
Decision technologies for smart	Computer-automated design
manufacturing	Computational intelligence
Equipment productivity improvement	
Intelligent cooperation and	
resource planning
