

CALL FOR PAPERS

ICSMC 2020
Mar 19-20, 2020
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSMC 2020 : International Conference on Smart Materials for Construction is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Smart Materials for Construction. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Smart construction materials and techniques
Super performing materials
Smart building materials
Smart materials in construction
Smart material innovative technologies
Innovative building materials
Recent technological innovations and impacts
Architectural advantages of innovative materials
Advanced structures and buildings
Innovation in materials technology
Innovative building materials solutions
Materials for energy efficiency and thermal comfort

Special purpose materials
Advanced testing techniques for building materials
Innovative, ecological and energy efficient building materials
Corrosion of building materials
Long performance and self-healing materials
Durability performance in harsh environments
Service life and performance prediction models
Translucent concrete, sensi tile, and radiant barriers
Solar panel roofing tiles and electrified wood
Flexicomb, kinetic glass, and clay bricks
Carbonfiber, self-repairing cement, and liquid granite
Bendable concrete
