

# CALL FOR PAPERS

**ICMMAMB 2020**  
**Mar 02-03, 2020**  
**Rio de Janeiro, Brazil**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMMAMB 2020 : International Conference on Medical Microbiology and Advances in Microbial Physiology is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Medical Microbiology and Advances in Microbial Physiology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Microbial diversity  
Microbial physiology  
Microscopic methods for assessing microbial diversity  
Microbial metabolism  
Microbial Ecology  
Microbial Genetics  
Microbial diversity and global environmental issues  
Microbial immunology  
The role of microbes in immune response  
Host interactions and system biology  
Innate and Adaptive Immunity  
Immune system regulatory control  
Fundamentals of medical microbiology

Causes and transmission of infectious diseases  
Viruses and infections  
Bacterial disease treatments  
Mycology and its medical preventions  
Parasitology and its treatments  
Microbial theory of cancer  
NTDs and STDs  
Pathology and medical practices  
Diagnostic microbiology  
Applied microbiology in clinical research  
Global market on vaccines and drugs  
Infectious diseases in plants  
Veterinary microbiology
