

CALL FOR PAPERS

ICSCDM 2020
Mar 02-03, 2020
Rio de Janeiro, Brazil

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSCDM 2020 : International Conference on Soft Computing and Data Mining is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Soft Computing and Data Mining. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Soft Computing
Ant and bee colonies
Fuzzy set theory
Genetic algorithms
Grey set theory
Immunological computing
Intelligent systems
Neural networks
Particle swarm optimization
Rough set theory
Soft set theory
Data Mining
Association rules

Classification
Clustering
Data cleaning
Data integration
Dimensionality reduction
Feature selection
Information system and retrieval
Outlier analysis
Visual data mining
Enterprise and Business Data
Management
Knowledge Acquisition & Management
Knowledge-based and Expert Systems
