

CALL FOR PAPERS

ICSPIN 2020
Mar 02-03, 2020
Rio de Janeiro, Brazil

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSPIN 2020 : International Conference on Signal Processing and Integrated Networks is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Signal Processing and Integrated Networks. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Adaptive Signal Processing
Adhoc Network
Advancements in Analog Signal Processors and DSP processors
Application of DSP in Remote Sensors
Architecture, Implementation and Applications of Digital Filters
Cellular Networks
Artificial Intelligence in Signal and Image Processing
Cognitive Radio and Dynamic Spectrum Management
Biomedical/Genomic Signal and Image Processing
Content Distribution Networks
Biometric Applications
Flow and Congestion Control
Data Mining and Retrieval for Image, Audio and Video

Geophysical / Radar / Sonar/Optical/ Smart Sensor Signal Processing
Image, Audio and Video Processing Techniques, Compression and Coding
Integrated Services Digital Networks (ISDN)
Information Theory, Forensics and Security
Mobile and Wireless Technologies (UWB, MIMO, WiMAX)
Multidimensional and Multimodal Signal Processing
Multiple Access Techniques
Multimedia Tools, Applications and Security
Network security and Threat Management
Multirate Signal Processing
Network Signal Processors
Non Stationary, Non Linear and Non Gaussian Signal Processing
Networking Issues and Challenges in Cloud Computing
