

# CALL FOR PAPERS

**ICBBE 2020**  
**Mar 05-06, 2020**  
**Rome, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBBE 2020 : International Conference on Bioinformatics and Biomedical Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Bioinformatics and Biomedical Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Bioinformatics and Biomedical Engineering	Biomedical imaging, image processing & visualization
Bioinformatics and Computational Biology	Bioelectrical and neural engineering
Protein structure, function and sequence analysis	Biomaterials and biomedical optics
Protein interactions, docking and function	Methods and biology effects of NMR/CT/ECG technology
Computational proteomics	Biomedical devices, sensors, and artificial organs
DNA and RNA structure, function and sequence analysis	Biochemical, cellular, molecular and tissue engineering
Gene regulation, expression, identification and network	Biomedical robotics and mechanics
Structural, functional and comparative genomics	Rehabilitation engineering and clinical engineering
Computational evolutionary biology	Health monitoring systems and wearable system
Data acquisition, normalization, analysis and visualization	Bio-signal processing and analysis
Algorithms, models, software, and tools in Bioinformatics	Biometric and bio-measurement
Any novel approaches to bioinformatics problems	Biomaterial and biomedical optics
Biomedical Engineering
