

# CALL FOR PAPERS

**ICCMAPM 2020**  
**Mar 05-06, 2020**  
**Rome, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCMAPM 2020 : International Conference on Computational Movement Analysis and Predictive Modeling is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Movement Analysis and Predictive Modeling. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computational movement analysis  
Analysis and visualization of movement  
Big mobility data analytics and predictive modeling  
Making movement analysis context-aware, considering the static and dynamic environment  
From individuals to collectives:  
Modeling and analyzing interactions between individuals  
Integrating different sensors and sensing models

From analysis to modeling:  
Simulation of movement and mobility  
Visualization and visual analytics in support of movement analysis  
From patterns to processes:  
Bridging the semantic gap  
Inferring behaviors and motivations underpinning movement  
Geoprivacy issues and geomasking methods for mobility data
