

CALL FOR PAPERS

ICGM 2020
Mar 05-06, 2020
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGM 2020 : International Conference on Geodesy and Methods is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geodesy and Methods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geodesy
Fundamentals
The shape and size of the earth
The gravity field of the earth
Point positioning
The gravity field of the earth
The geodetic earth model
Methods of measurement
Methods of evaluation
Geodetic and gravimetric networks
Structure and dynamics of the earth
Elements of geodesy
The problem of geodesy

The spherical earth model
The ellipsoidal earth model
The geoid, arc measurements and national geodetic surveys
Three-dimensional geodesy
Four-dimensional geodesy
Reference systems
Basic units and fundamental constants
Time systems
Atomic time, dynamical time
Sidereal and universal time
Geoid and reference ellipsoid
Coordinate systems in space
Coordinate systems in the plane
