

CALL FOR PAPERS

ICISSET 2020
Mar 05-06, 2020
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICISSET 2020 : International Conference on Information and Software Engineering and Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Information and Software Engineering and Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Information and software
technology
Software management, quality and
metrics
Software processes,
Software architecture, modelling,
specification, design and
programming

Functional and non-functional
software requirements
Software testing and verification
and validation
Empirical studies of all aspects of
engineering and managing software
development
