

# CALL FOR PAPERS

**ICLEWTCM 2020**  
**Mar 05-06, 2020**  
**Rome, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICLEWTCM 2020 : International Conference on Lifetime Extension of Wind Turbines and Condition Monitoring is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Lifetime Extension of Wind Turbines and Condition Monitoring. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

End-of-life issues of wind turbines  
End-of-life issues of wind farms  
Operations and maintenance  
New operational strategies  
Wind turbine assessment  
Novel condition monitoring techniques

Novel health structural assessment  
Safety and risks associated to lifetime extension  
Influence of reliability and availability on lifetime extension  
Analysis of the age of the wind turbine fleet in different locations, regions, countries, and/or geographical areas  
Economic analyses (CAPEX, OPEX, COE, etc.) towards decision making
