

CALL FOR PAPERS

ICNSD 2020
Mar 05-06, 2020
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNSD 2020 : International Conference on Nonbuilding Structure Design is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Nonbuilding Structure Design. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Civil engineering
Structural engineering
Building structure
Nonbuilding structure
Building structures and technology
Modern building structure
Durability and sustainability
Building physics
Structural design
Building design
Structural pattern
Design and analysis
Stability, strength and rigidity of built structures

Mechanical structures
Construction and structure
Structural failure
Base isolation system
Seismic performance
Functioning and safety of building structure
Research, planning and design of permanent and temporary structures
Construction, inspection and monitoring of permanent and temporary structures
Maintenance, rehabilitation and demolition of permanent and temporary structures
Technical, economic, environmental, aesthetic and social aspects of structures
Residential and recreational developments
Physical laws and empirical knowledge of the structural performance
Structural elements to build complex structural systems
