

CALL FOR PAPERS

ICPSMC 2020
Mar 05-06, 2020
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPSMC 2020 : International Conference on Power System Management and Control is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Power System Management and Control. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Power system management	
Power system management technologies	Modeling and simulation of large power systems
Integrated substation automation technologies	Application of wide area measurement system
Power system monitoring and mitigation technologies	Power system analysis and optimization
Online monitoring and fault diagnosis system	Load modeling, estimation and forecast
Control strategies for modern power system stability	Power system planning and operation
