

CALL FOR PAPERS

ICRACCST 2020
Mar 05-06, 2020
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRACCST 2020 : International Conference on Recent Advances in Carbon Capture and Storage Technologies is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Recent Advances in Carbon Capture and Storage Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Carbon capture and storage
Carbon capture and storage developments
Capture, transport, and storage technologies
Carbon dioxide capture and storage
Analysis of carbon capture and storage technology
Sources of CO₂
Capture of CO₂
Transport of CO₂
Underground geological storage
Ocean storage

Mineral carbonation and industrial uses of carbon dioxide
Costs and economic potential
Implications of carbon dioxide capture and storage for greenhouse gas inventories and accounting
Existing applications of industrial CCS
Carbon capture and storage on natural gas processing
Carbon capture and storage on fertilizer production
Carbon capture and storage on coal gasification
Carbon capture and storage on hydrogen production
Carbon capture and storage on iron and steel making
