

CALL FOR PAPERS

ICSMM 2020
Mar 05-06, 2020
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSMM 2020 : International Conference on Structural Mechanics and Methods is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Structural Mechanics and Methods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Civil engineering	Structure's geometric representation
Structural engineering	Support conditions
Structural mechanics	The materials' properties
Deformations, deflections, and internal forces	Mechanics of structures
Structural mechanics analysis	Energy methods
Energy principles in structural mechanics	Flexibility method
General principles	Direct stiffness method
Structural mechanics and dynamics	Plastic analysis approach
Computational structural mechanics	Building structure
Elastic systems	Nonbuilding structure
Linear elastic systems	Building structures and technology
Advanced computational applications in structural mechanics	Structural design
Structural load	Building design
