

CALL FOR PAPERS

ICWFATA 2020
Mar 05-06, 2020
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWFATA 2020 : International Conference on Wireless Factory Automation Technologies and Applications is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wireless Factory Automation Technologies and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Wireless factory automation
Wireless communication for factory automation
Reliable, high performance wireless systems for factory automation
Industrial wireless systems
Wireless systems for industrial environments
High-performance wireless networks for critical industrial control
Wireless industrial communication for sustainable manufacturing

5g and mobile networks for industrial communications
Industrial wireless systems measurements, simulation, and testing
Selection and deployment of wireless technologies in industry
Standardization of industrial wireless systems
Security for industrial wireless systems
Wired and wireless convergence in industrial systems
Practical guidelines for field deployment
