

CALL FOR PAPERS

ICWMP 2020
Mar 05-06, 2020
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWMP 2020 : International Conference on Watershed Management and Protection is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Watershed Management and Protection. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Watershed management
Urban watershed management
Watershed and river basin management
Principles of watershed management
Good watershed management practices
Case studies and examples from various countries
Decision support tools
Monitoring, GIS, and data/information management
Ecological economics
Cost/benefit analysis

Decision making models
Legislation and policies
Participatory methods
Water user partnerships
Integrated environmental model applications for management
Watershed, air shed, coastal, and living resource models
Adaptive water resources management
Trans-boundary environmental issues
Climate change, air pollution, coastal ocean effects at regional, continental, and global scales
Global watershed sustainability
