

CALL FOR PAPERS

ICCSCCHB 2020
Mar 26-27, 2020
Sydney, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSCCHB 2020 : International Conference on Composite Steel-Concrete Construction and House Building is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Composite Steel-Concrete Construction and House Building. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Composite steel-concrete
construction

Composite construction

Steel-concrete composite buildings

Advantages of steel-concrete
composite construction

Composite steel structures

Composite steel and concrete
structure design requirements

Fatigue design of steel and
composite structures

Life cycle cost analysis of
buildings

Sustainable design of
deconstructable steel-concrete
composite construction

Stability and ductility of steel
structures

Composite steel and concrete
structural systems for seismic
engineering

House building

Composite wood decking

High performance composites

Structural analysis

Composite materials

Composite members

Composite floor construction

Composite bridges

Propped construction

Resistance of section

Continuous beams and slabs

Shear connection

Composite columns

Partially encased steel sections

Composite slabs
