

# CALL FOR PAPERS

**ICBETA 2020**  
**Mar 23-24, 2020**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBETA 2020 : International Conference on Building Enclosure Technologies and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Building Enclosure Technologies and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Building enclosure science and technology  
Innovative materials and new thermal insulating systems  
Window condensation and sloped windows  
Building envelope research  
Moisture control and water intrusion  
Quality control, monitoring and management

Design of high performance buildings  
Dynamic and integrated walls  
Building envelope performance tools  
Hygrothermal models  
Fenestration, moisture control and indoor air quality  
Quality management and whole systems design
