

CALL FOR PAPERS

ICCESSC 2020
Mar 23-24, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCESSC 2020 : International Conference on Computer Engineering, Speech Signals and Speech Conversion is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computer Engineering, Speech Signals and Speech Conversion. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computer engineering
Electrical engineering and computer science
Speech signals
Processing methods of speech signals
Signal, image and speech processing
Digital representation
Digital signal processing
Analog signal processing
Continuous-time signal processing
Speech coding
Speech conversion
Discrete-time signal processing
Digital signal processing

Nonlinear signal processing
Acquisition, manipulation, storage, transfer and output of speech signals
Speech recognition
Computer networks
Coding, cryptography, and information protection
Communications and wireless networks
Networking for communication and sensor systems
Computer and network security
Computer hardware and software
Hardware platforms
Software applications
Software design
Writing software and firmware
