

# CALL FOR PAPERS

**ICGDI 2020**  
**Mar 23-24, 2020**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGDI 2020 : International Conference on Geospatial Defense and Intelligence is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geospatial Defense and Intelligence. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geospatial intelligence systems and technologies

Strategic, operational and tactical geospatial information and intelligence

The importance and impact of geospatial intelligence on national security

The use of GIS applications in military forces to revolutionize the way military forces operate

Using GIS applications to support the fight against terrorism

Enable mission success with authoritative information from GIS technology

Formulating a framework using GIS to develop into a world leading Smart City

GIS innovations in the public sector for sustainable development

GIS for cutting-edge planning and analysis system for critical urban planning and design work

Command and control

Defense mapping organizations

Base operations and facility management

Force protection and security

Environmental security and resource management

Health and hygiene

Intelligence, surveillance, and reconnaissance systems

Logistics

Military engineering

Mine clearance and mapping

Mission planning

Peacekeeping operations

Modeling, simulation, and training

Terrain analysis

Visualization
