The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGOMGG 2020 : International Conference on Geological Oceanography, Marine Geology and Geochemistry is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geological Oceanography, Marine Geology and Geochemistry. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Marine geology
Geological oceanography
Geophysical, geochemical,
sedimentological and
paleontological investigations of
the ocean floor and coastal zone
Hydrogeology
Seafloor hydrothermal systems

Beach dynamics and early
diagenesis
Microbiological studies in
sediments
