

# CALL FOR PAPERS

**ICHEIME 2020**  
**Mar 23-24, 2020**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICHEIME 2020 : International Conference on Hospital Engineering Innovations and Medical Equipment is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Hospital Engineering Innovations and Medical Equipment. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Hospital engineering innovations  
Medical technology innovations  
Health information technology innovations  
Medical equipment innovations  
Imaging technology  
Innovations in medical imaging and virtual microscopy  
Medical technology management  
Health technology assessment of medical devices  
Health technology regulation  
Health technology assessment in health systems  
International collaboration in health technology assessment  
Challenges for using health technology assessment in developing and emerging countries  
Strategies for developing health technology assessment

Basic health technology frameworks  
Health information technology  
Costs and benefits of health information technology  
Problems with health information technology  
Health care quality or effectiveness  
Health care productivity or efficiency  
Medical errors and health care accuracy  
Health care costs  
Administrative efficiencies and healthcare work processes  
Clinical point of care technology  
Technological innovations, opportunities and challenges  
Patient billing  
Accounting systems
