

CALL FOR PAPERS

ICMLMI 2020
Mar 23-24, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMLMI 2020 : International Conference on Machine Learning and Machine Intelligence is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Machine Learning and Machine Intelligence. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Artificial neural networks
- Association rule learning
- Automata, logic and games
- Bayesian networks
- Clustering
- Commercial software
- Commercial software with open-source editions
- Complex systems
- Computational complexity
- Computational learning theory
- Computational linguistics
- Computer animation
- Computer science

- Computer system
- Concurrent algorithms and data structures
- Data mining
- Decision tree learning
- Deep Learning
- Design and analysis of algorithms
- Genetic algorithms
- Inductive logic programming
- Intelligent systems
- Lambda calculus and types
- Logic and proof
- Machine learning
- Models of computation
