

CALL FOR PAPERS

ICNAWWW 2020
Mar 23-24, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNAWWW 2020 : International Conference on Network Analysis and World Wide Web is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Network Analysis and World Wide Web. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Intelligent World Wide Web
Distributed architectures for structured data on the Web
Emergent semantics of structured data repositories
Ontologies and representation languages
Search and retrieval based on document understanding
Web data mining, ontology learning
Applications of semantic web formats for learning and science
Social network analysis and graph algorithms for the web
Web of things, ubiquitous and mobile computing

Web mining and content analysis
User modeling, behavior and experience
Intelligent and autonomous systems on the web
User modeling, personalization, and experience
Social network analysis and graph algorithms
Intelligent systems and infrastructure
Economics, monetization, and online markets
Crowdsourcing and human computation
Future of the web
