

CALL FOR PAPERS

ICNMMAS 2020
Mar 23-24, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNMMAS 2020 : International Conference on Nanomaterials, Microstructure, Macrostructure and Atomic Structure is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Nanomaterials, Microstructure, Macrostructure and Atomic Structure. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Materials science and engineering
Structure
Performance of construction
materials
Atomic structure
Nanostructure
Microstructure
Macrostructure
Durability and mechanical
properties
Materials in research
Nanomaterials
Biomaterials
Discovery and design of new
materials
Solids

Metallurgy and mineralogy
Materials paradigm
Nanotechnology, biomaterials and
metallurgy
Intellectual origins of materials
science
Failure analysis
Investigating materials, products,
structures or components
Fundamentals of materials science
Electronic, optical and magnetic
materials
Computational materials science and
materials theory
Materials in industry
Ceramics and glasses materials
Composite materials
Polymers materials
