

# CALL FOR PAPERS

**ICAMME 2020**  
**Apr 09-10, 2020**  
**Athens, Greece**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAMME 2020 : International Conference on Advanced Materials, Microscopy and Energy is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advanced Materials, Microscopy and Energy. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Advanced materials and energy  
Nanomaterials  
Carbon nanotube and graphene  
Materials for industrial applications  
Materials for medical applications  
Materials for environment protection  
Materials for solar energy  
Advanced optical materials  
Thermoelectric materials and their applications  
Magnetic materials  
Materials for energy storage  
Energy applications of nanomaterials

Thermal power  
Additive manufacturing  
Advanced microscopy techniques  
Electron-microscopy of materials and nanomaterials  
Processing methods and advances in characterization techniques  
Surfaces properties  
Gaseous scanning electron microscopy  
Transmission electron microscopy  
Structural and chemical characterizations  
Mineralogy and mineral resources  
Treatment and use of mineral resources  
Phosphate materials and applications
