

# CALL FOR PAPERS

**ICRDSRM 2020**  
**Apr 09-10, 2020**  
**Athens, Greece**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRDSRM 2020 : International Conference on Recent Developments in Superconducting Rotating Machines is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Recent Developments in Superconducting Rotating Machines. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Superconducting rotating machines  
Advances in superconducting  
rotating machines  
Recent advances in superconducting  
rotating machines  
Superconducting rotating machines  
for industrial applications

Advantages and disadvantages of  
superconducting electric machines  
Development status of  
superconducting rotating machines  
High power density superconducting  
rotating machines  
High-temperature superconductors  
versus low-temperature  
superconductors
