

CALL FOR PAPERS

ICSMPT 2020
Apr 09-10, 2020
Athens, Greece

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSMPT 2020 : International Conference on Sustainable Metals Processing Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sustainable Metals Processing Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Sustainable metals processing
Materials modelling for metals processing
System integrated and sustainable metals production
High temperature processes and industrial ecology
Sustainability assessments of material life cycles
Solidification and microstructure simulation

Thermodynamics for material and process development
Extraction and refining of metals
Interaction of liquid slag and metals with refractory materials
Thermodynamic and kinetic modeling of processes and interface reactions
Material characterization
