

# CALL FOR PAPERS

**ICACC 2020**  
**Apr 16-17, 2020**  
**Cape Town, South Africa**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACC 2020 : International Conference on Atmospheric Chemistry and Clouds is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Atmospheric Chemistry and Clouds. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Atmospheric chemistry  
Atmospheric composition  
Methodology  
Observation  
Laboratory studies  
Modeling  
Carbon cycle and climate  
Atmospheric chemistry, aerosols and clouds  
Composition of tropospheric air  
Sources, transport, and sinks of trace gases  
Some important tropospheric trace gases  
The hydroxyl radical  
Some reactive nitrogen compounds

Organic compounds  
Carbon monoxide  
Ozone  
Hydrogen compounds  
Sulfur gases  
Tropospheric aerosols  
Sources  
Chemical composition  
Concentrations and size distributions  
Residence times  
Air pollution  
Some sources of pollutants  
Smogs
