

# CALL FOR PAPERS

**ICAGE 2020**  
**Apr 16-17, 2020**  
**Cape Town, South Africa**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAGE 2020 : International Conference on Advances in Geotechnical Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Geotechnical Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geotechnical engineering  
Advances in geotechnical engineering  
Geotechnical engineering and applications  
Soil structure interaction modeling  
Excavation support design  
Underpinning and micropile design  
Ground improvement and grouting  
Slope stabilization and soil nailing  
Foundation design  
Retaining wall design

Helical pier design, micropile design and test pile reaction frame design  
Falsework and formwork  
Shoring and bracing of structures  
Demolition plans for bridges and buildings  
Roll-in/roll-out structures for railroad bridges and other structures  
Underpinning  
Spreader beams and lifting eyes  
Reinforced soil structure walls and reinforced soil slopes  
Value engineering
