

CALL FOR PAPERS

ICAPAEWCT 2020
Apr 16-17, 2020
Cape Town, South Africa

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAPAEWCT 2020 : International Conference on Antennas and Propagation Aspects for Emerging Wireless Communication Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Antennas and Propagation Aspects for Emerging Wireless Communication Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Multi-beam antenna technologies for 5G wireless communications
Millimeter wave (mmWave) and THz antennas for 5G wireless communications
Propagation model at mmWave and THz bands
Compact antenna arrays for massive MIMO systems
mmWave and large-scale MIMO channel model

Antennas for implantable systems and IoT applications
Advanced antennas and transceivers for full-duplex communication
Distributed antenna systems for 5G multi-user networks
mmWave and THz cooperative relays for coverage extension
