

CALL FOR PAPERS

ICCCCE 2020
Apr 16-17, 2020
Cape Town, South Africa

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCCCE 2020 : International Conference on Construction, Culture and Construction Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Construction, Culture and Construction Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Construction and culture	Construction and human evolution
Construction engineering	Identity formation mechanisms
Cultural context of construction	Nation-building strategies
Evolution and expansion of built environments	National identity
Ethical and historical value systems	Construction and culture production
Relationship between culture, geography, construction materials and built expressions of cultural legacy	Designing and planning
Construction industry	Construction and management of infrastructures
Built environment and society	Construction technologies
Organizational climate and culture	Construction estimating software
Technology and culture	Construction management
Evaluation of construction
