

CALL FOR PAPERS

ICCE 2020
Apr 16-17, 2020
Cape Town, South Africa

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCE 2020 : International Conference on Chemical Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Chemical Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Chemical, Environmental, and Process Engineering	Chemistry and Chemical Engineering Fundamentals
Environmental engineering and sustainable development	Chemical engineering fundamentals
Process design and optimization	Physical, Theoretical and Computational Chemistry
Product innovation, development and economics	Chemical engineering educational challenges and development
Process intensification	Chemical reaction engineering
Nanotechnology	Chemical engineering equipment design and process design
New materials & structured products	Thermodynamics
Intelligent polymers	Catalysis & reaction engineering
Green organic synthesis routes	Particulate systems
Process integration	Rheology
Environmental engineering & management	Multifase flows
Sustainable & clean technologies	Interfacial & colloidal phenomena
SCF as solvent substitutes
