

CALL FOR PAPERS

ICMMC 2020
Apr 16-17, 2020
Cape Town, South Africa

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMMC 2020 : International Conference on Configuration Management, Monitoring and Control is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Configuration Management, Monitoring and Control. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Configuration management and applications
Advances in configuration management
Configuration management and containerization
Operating system configuration management
Preventive and predictive maintenances
Configuration management at scale

Orchestration, software-defined networking, building stacks of systems, etc.
Application configuration management
Unit testing and performing continuous integration of configurations
Future challenges and opportunities in configuration management
Integrating deployment and configuration management
Managing configuration management
