

CALL FOR PAPERS

ICDAICSTDME 2020
Apr 16-17, 2020
Cape Town, South Africa

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDAICSTDME 2020 : International Conference on Data Analysis in Intelligent Communication Systems, Transportation Data Mining and Exploration is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Data Analysis in Intelligent Communication Systems, Transportation Data Mining and Exploration. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Data distribution platforms for ICS
Data optimization for ICS
Online optimization for real time traffic data
Spatiotemporal visual analysis for ICS
Internet of Things and Internet of Vehicles
Transportation data mining and exploration

Advanced driver assistance systems
Traffic estimation and prediction system
New paradigms for ICS/Vehicular communication
Cloud computing based big data mining
Fusion of multisource mobility data
Vehicle dynamics and control system
