

# CALL FOR PAPERS

**ICDASE 2020**  
**Apr 16-17, 2020**  
**Cape Town, South Africa**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDASE 2020 : International Conference on Data Analysis for Software Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Data Analysis for Software Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Data analysis in software engineering  
Data science for software systems  
Software engineering, data analysis and data mining  
Software cost estimation, software size estimation  
Process measurement and estimation  
Software quality/testing

Supervised or predictive techniques  
Regression, genetic programming, and decision trees  
Clustering and association rules  
Semisupervised learning and text mining  
Experimentation and hypothesis tests
