

CALL FOR PAPERS

ICGPQ 2020
Apr 16-17, 2020
Cape Town, South Africa

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGPQ 2020 : International Conference on Grid Performance and Quality is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Grid Performance and Quality. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Grid performance and reliability
Utility modeling, simulation, and analysis tools for grid performance
Grid planning, operations, and reliability
Grid-friendly PV interconnection technologies
PV generation for the distribution and transmission grid

Developing validated inverter, solar system planning, and operations
Enhancing PV integration analysis techniques
High-penetration PV scenarios through laboratory and field testing
Advancing interconnection and performance standards and codes
PV integration for grid reliability
