

CALL FOR PAPERS

ICICIT 2020
Apr 16-17, 2020
Cape Town, South Africa

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICICIT 2020 : International Conference on Intelligent Communication and Information Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Intelligent Communication and Information Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Intelligent communication
- Information technology
- Communication network structure
- Information superhighways
- Intelligent communication systems
- Computer vision
- Computational techniques
- Wireless radio technology
- Broadcast technology
- Optical communication
- Communication hardware evolution
- Mobile technologies
- Machine to machine communication networks

- Routing techniques
- Network analytics
- Network applications and services
- Technologies for e-communication
- Global telecommunication regulations
- Wireless ad hoc and sensor networks
- Ultra-dense wireless network
- Signal processing for communications
- Network management and traffic engineering
- Applied cryptography
- Future internet architecture and protocols
- Communication software and networked intelligence
- Biometrics
