

CALL FOR PAPERS

ICMGRE 2020
Apr 16-17, 2020
Cape Town, South Africa

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMGRE 2020 : International Conference on Mining Geology and Rock Excavation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Mining Geology and Rock Excavation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mining geology

Geological methods in mineral exploration and mining
Geological structure of the earth
Classification of mineral deposits
Geology and mining operations
Structural geology in exploration and mining
Geomechanics
Sustainable resource development
Mineral processing
Designing, building and operating surface and underground mines
Mine finance
Mine information and production technology
Geotechnical and geomechanical designs and projects in rock and soil

Geographic information systems and geophysics

Rock excavation
Equipment operations technology
Probability and statistics
Underground construction
Mining geology and exploration
Mining and mineral process
Mining exploration methods
Role of exploration in mining
Heavy minerals in exploration
Sequential exploration model
Onshore and offshore exploration
Mineral exploration and drilling
