

CALL FOR PAPERS

ICSSCSP 2020
Apr 16-17, 2020
Cape Town, South Africa

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSSCSP 2020 : International Conference on Software System Construction Standards and Programming is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Software System Construction Standards and Programming. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Software system construction

Principles of software system construction

Tools for software system construction

Software construction

Applications of software construction

Current and common problems

Minimizing complexity

Anticipating change

Constructing for verification

Software construction and reuse

Standards in construction

Programming languages

Coding standards

Construction platforms

Construction tools

Construction models

Construction planning

Construction measurement

Construction design

Construction languages

Coding and programming

Construction testing

Construction quality

Integration

Construction technologies

Object-oriented runtime issues
