

CALL FOR PAPERS

ICFHMCB 2020
Apr 24-25, 2020
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFHMCB 2020 : International Conference on Forest Health Management and Conservation Biology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Forest Health Management and Conservation Biology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Forest health
Forest invasive species
Invasive plants and animals
Climate change and forest health
Forest health monitoring and management
Forest site management
Forest degradation
Forest conservation and health care
Forest disease management
Forest pest management
Integrated pest management in tropical forestry
Biological control: principles and applications
Forestry pest and disease management

Epidemiology of forest diseases
Forest diseases caused by viruses
Forest diseases caused by prokaryotes
Forest diseases caused by higher parasitic plants
Pine wilt disease and other nematode diseases
Seed, seedling and nursery diseases
Responding to diseases caused by exotic tree pathogens
Forest pathology
Impact of adverse environmental conditions on trees
Forest ecosystems
Effects of air pollution of forest health
The impacts of climate change impacts on forests
Forest health management
