

CALL FOR PAPERS

ICGMM 2020
Apr 24-25, 2020
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGMM 2020 : International Conference on Geomorphological Mapping Methods is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geomorphological Mapping Methods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geomorphological mapping
Geomorphological field mapping
Methods and applications
Techniques of applied
geomorphological mapping
Standardization and flexibility
Aerial photographs and satellite
data
Landform mapping in synthetic
(holistic) surveys of terrain
Geomorphological map scale
New tools in geomorphological
mapping
Problems and efforts in current
geomorphological mapping

Object-oriented multiscale
geomorphological mapping
GIS-based geomorphological mapping
Geomorphological contributions to
landslide risk assessment
Landslide susceptibility, hazard
and risk
Landslide hazard and risk mapping
for rural infrastructure planning
Landslide mapping for land use
planning
Procedures and protocols
Analogue data
Digital data
Recent trends, problems and future
perspectives
