

CALL FOR PAPERS

ICSDMSM 2020
Apr 24-25, 2020
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSDMSM 2020 : International Conference on Software Domain Modeling and System Maintenance is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Software Domain Modeling and System Maintenance. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Software analysis, design and modeling
Software maintenance and evolution
Software engineering tools and environments
Software engineering decision support
Automated software design and synthesis
Automated software specification
Computer-supported cooperative work
Software design patterns
Software product lines

Process and workflow management
Reflection and metadata approaches
Program understanding and system maintenance
Software domain modeling and analysis
Software economics
Multimedia and hypermedia
Software engineering case study and experience reports
Enterprise software, middleware, and tools
