

CALL FOR PAPERS

ICSTLSFP 2020
Apr 24-25, 2020
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSTLSFP 2020 : International Conference on Short-Term Liner Ship Fleet Planning is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Short-Term Liner Ship Fleet Planning. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Liner ship fleet planning
Models and algorithms
Mathematical modelling
Stochastic programming
Chance constrained programming
Solution algorithms
Sample average approximation
Dual decomposition and lagrangian relaxation

Risk management in liner ship fleet deployment
Automated planning for liner shipping fleet repositioning
Liner shipping route of traditional transportation
Short-term liner ship fleet planning with container transshipment
Designing optimal routes in a liner shipping problem
Multi-period liner ship fleet planning
Ship scheduling and cost analysis for route planning in liner shipping
