

CALL FOR PAPERS

ICAEPE 2020
Apr 16-17, 2020
Lisbon, Portugal

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAEPE 2020 : International Conference on Advances in Electric Power Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Electric Power Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electrical Power Engineering
Restructuring of the electricity industry and transnational networks
Planning and operation of power systems under market conditions
System services in deregulated markets
Integration of distributed generation in the main grids
Smart Grids
Power system dynamics, stability and control
Cascade faults and blackouts
Electromagnetic compatibility/Power quality
Lightning and electromagnetic transients

Diagnostics and reliability
Power system protection
Power system insulation
Power electronics
Renewable energy sources and storage devices
Power system instrumentation, measurements and automation
Electric devices
Nuclear Energy Safe Utilization
Nuclear Spent Fuel Management
