

# CALL FOR PAPERS

**ICSEA 2020**  
**Apr 16-17, 2020**  
**Lisbon, Portugal**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSEA 2020 : International Conference on Structural Engineering and Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Structural Engineering and Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Structural engineering  
Building structures  
Earthquake engineering structures  
Civil engineering structures  
Mechanical structures  
Aerospace structures  
Nanoscale structures  
Structural engineering for medical science  
Structural elements  
Structural design  
Building design  
Structural pattern  
Design and analysis

Stability, strength and rigidity of built structures  
Building structure  
Nonbuilding structure  
Mechanical structures  
Construction and structure  
Structural failure  
Base isolation system  
Seismic performance  
Functioning and safety of building structure  
Research, planning and design of permanent and temporary structures  
Construction, inspection and monitoring of permanent and temporary structures  
Maintenance, rehabilitation and demolition of permanent and temporary structures  
Technical, economic, environmental, aesthetic and social aspects of structures
