

CALL FOR PAPERS

ICIULSS 2020
Apr 23-24, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICIULSS 2020 : International Conference on Innovations in Ultra-Large-Scale Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Innovations in Ultra-Large-Scale Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Ultra-large-scale systems	Performance and power
Software technologies for ultra-large scale systems	System configuration
Complexity of software-intensive systems	Radical scale-up of systems
Future software-intensive systems	Implementation complexity
Size and structure of development organizations and methods	Distribution
Complexity of organizations surrounding deployed systems	Decentralization
Performance engineering	Networking
System anomaly and failure detection	Storage
Monitoring of ultra-large-scale systems	Quality-of-service
Log engineering	Dependability/security
Debugging ultra-large-scale systems
