

CALL FOR PAPERS

ICSPCT 2020
Apr 23-24, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSPCT 2020 : International Conference on Software Programming and Coding Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Software Programming and Coding Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Software programming
- Software development
- Software development and programming
- Programming without coding technology
- Information management
- Systems analysis
- Test programs
- Methods used to build software
- Types of programming languages
- High-level languages
- Low-level languages

- Data and databases
- C language programming
- Python programming
- Building mobile applications for android
- Structured, event-driven, object-oriented programming
- Computer information systems
- Mobile applications
- Application development
- Software applications and programming
- Web development
