

CALL FOR PAPERS

ICAMME 2020
Apr 23-24, 2020
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAMME 2020 : International Conference on Advanced Materials, Microscopy and Energy is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advanced Materials, Microscopy and Energy. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Advanced materials and energy
Nanomaterials
Carbon nanotube and graphene
Materials for industrial applications
Materials for medical applications
Materials for environment protection
Materials for solar energy
Advanced optical materials
Thermoelectric materials and their applications
Magnetic materials
Materials for energy storage
Energy applications of nanomaterials

Thermal power
Additive manufacturing
Advanced microscopy techniques
Electron-microscopy of materials and nanomaterials
Processing methods and advances in characterization techniques
Surfaces properties
Gaseous scanning electron microscopy
Transmission electron microscopy
Structural and chemical characterizations
Mineralogy and mineral resources
Treatment and use of mineral resources
Phosphate materials and applications
